

Firmware Revision Notice

Version 2.33

This is to announce that new firmware—version 2.33—is available for the Sound Devices 970 audio recorder and the Video Devices PIX video decks: PIX 270i, PIX 250i, and PIX 260i. This announcement provides a brief listing of any new features and changes that have become available after the product user guides were published. Fixes are detailed on the download webpage.

For more information, visit the web links below.

New Features

This section provides information on new features. Not all features apply to every PIX recorder. The products to which a feature applies are provided in brackets beside each header.

Transport Control Support for DAWs & NLEs [970, PIX 250i, PIX 260i, PIX 270i]

This version of firmware implemented RS-422 Servo Lock Status Bit to support transport control from more DAWs and NLEs.

Dante Sync Option [970, PIX 270i]

Dante Sync has been added to the 970 and as an Audio Only Mode option on the PIX 270i.

To use Dante Sync:

1. Press MENU.
2. Select Timecode/Sync > Sync Ref – Audio Only Mode > Dante.

Changes

This section provides information on changes to existing features.

Dante Integration [970, PIX 260i, PIX 270i]

- Dante Brooklyn II Firmware updated to 3.10.2.4
