

Firmware Revision Notice Version 1.11

This notice applies to the MixPre Series product line. This document describes new features in an officially released version of the firmware as well as changes to existing features that might have become available after the product documentation was published. The most up-to-date documentation for your Sound Devices product can be found online at: www.sounddevices.com/support/downloads

New Features

This section provides information on new features added to this version of firmware.

File Time Remaining

- When playing back a file, the file's remaining time is now shown in the status bar. As demonstrated in the following example, the MixPre is 17 seconds into playback of a 33-second recording, so the remaining 16 seconds is displayed on the status bar at the bottom of the screen.

Changes

This section provides information on changes to existing features.

User Interface

- The File List number is now editable from 1 to 9999.
- The current project name is now displayed in the Menu>Project header.
- The headphone output is briefly muted when Aux In mode is changed to prevent loud audible pops.
- Various system improvements and enhancements.
