

Firmware Revision Notice Version 4.51

This notice applies to the 6-Series product line. This document describes new features in an officially released version of the firmware as well as changes to existing features that might have become available after the included product documentation was published. The most up-to-date documentation for your Sound Devices product can be found online at: www.sounddevices.com/support/downloads

New Features

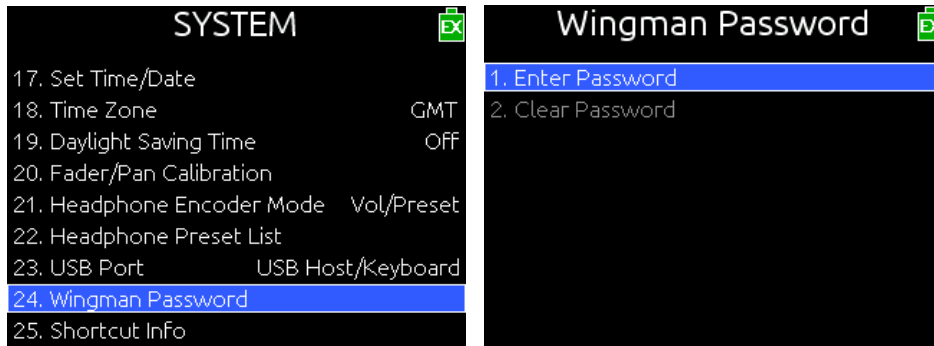

This section provides information on new features added to this version of firmware.

Wingman Support & Security

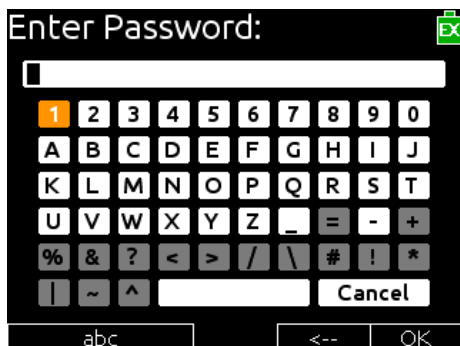

- Support for Wingman app v2.00 which includes:
 - Optional password-protected control of the 6-Series mixers
 - Landscape orientation for iPad
 - Various other fixes and improvements
- Added Wingman Password sub-menu (in the System menu) for setting a password that will then have to be entered in Wingman to gain control of the 6-Series mixer.

To set a password for the Wingman App:

1. On the mixer, press MENU.
2. Select SYSTEM > Wingman Password > Enter Password.

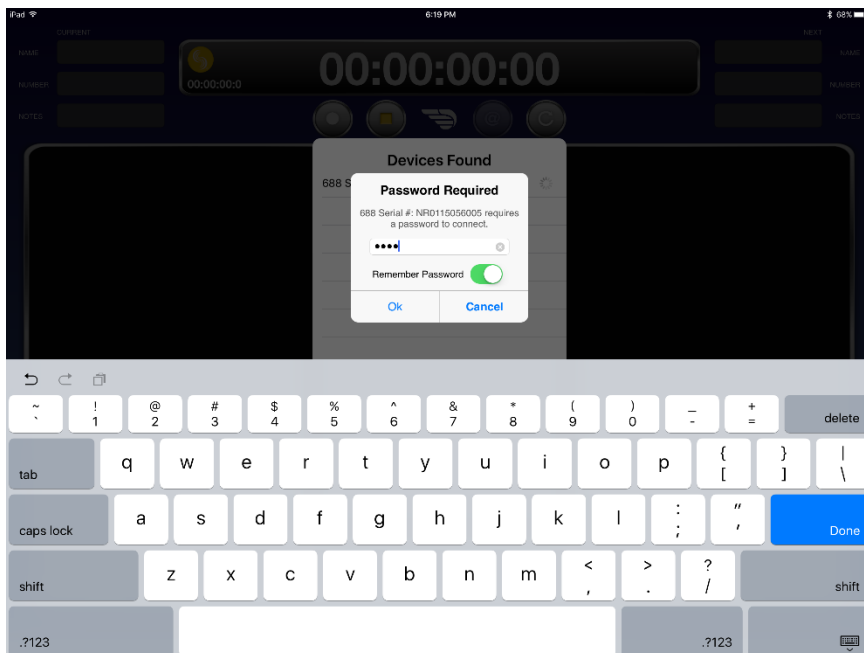

3. When the virtual keyboard appears, enter a password. (A USB keyboard may also be used.)

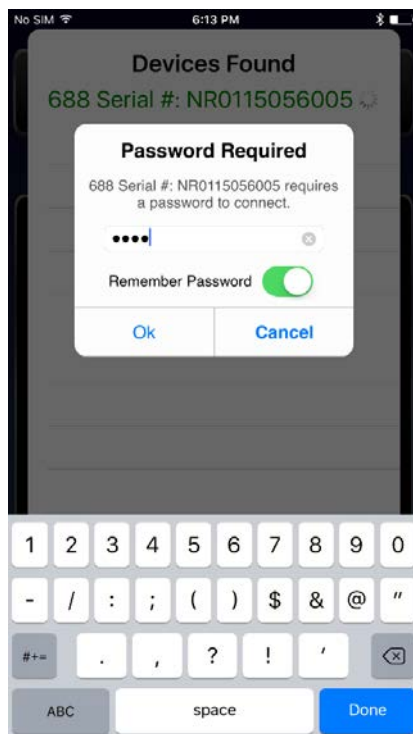

Note: If nothing is entered, Wingman will connect with no password required.

4. When finished, slide right the RTN/FAV switch (AB/C switch on 664) to select OK.
5. When prompted to confirm, press the Headphone encoders to select OK again.

After a password is set up on the mixer, when trying to connect to that mixer, Wingman will require the user to enter the password. The following image shows the Password Required dialog box in the Wingman App on an iPad (landscape orientation).

Remember Password allows the password to be saved and automatically entered during future connections on the iOS device. Here's what the dialog looks like on an iPhone.

Changes

This section provides information on changes to existing features related to the 2.00 version of Wingman, supported by v4.51 firmware on 6-Series mixer/recorders.

Wingman App

- Optional password-protected remote control of the 6-Series mixer/recorders.
- Optional password-protected remote control of the new MixPre-3 and MixPre-6 recorders.
- Landscape orientation for iPad.
- Various other fixes and improvements.
