

Firmware Revision Notice Version 4.00

This notice applies to the 6-Series product line. This document describes new features in an officially released version of the firmware as well as changes to existing features that might have become available after the included product documentation was published. The most up-to-date documentation for your Sound Devices product can be found online at: www.sounddevices.com/support/downloads

New Features

This section provides information on new features added to this version of firmware.

Support for Wingman iOS application by Sound Devices, LLC and Sound Devices WM-Connect

- WM-Connect is an optional hardware accessory that connects to the 688, 664, or 633 USB Port via a USB A-to-B adapter (included) or directly to the CL-12 keyboard port. WM-Connect uses Bluetooth® Smart technology and automatically pairs with iOS devices running v8.0 or later. 
- Wingman is a free app, with which a sound mixer can:
 - Remotely control Record, Stop, False Take, and Circle commands
 - View Audio Metering, Timecode, Absolute time, Record Status, and more
 - Arm/Disarm Tracks for recording and manage track naming
 - Edit metadata of upcoming, current, and up to 50 previous recorded takes, including:
 - Scene
 - Take
 - Notes
 - Circle Status
 - Track Names
 - Manage, Create, and Email Sound Reports

Changes

This section provides information on changes to existing features related to this version of firmware on 6-Series mixer/recorders.

- (688 only) Channel 7-12 Trim Gain factory default is now 0dB, was 6dB.
